## PLASTIC CABLE TRUNKING

### Description:

Cable trunkings are practical solution of organizing power and communication cables in office and residential buildings. They increase the reliability in operation of the electrical systems and allow quick adaptation if necessary to rearrange the interior. Fast and simple installation. In combination with a wide range of accessories, building irregularities are quickly overcome. Non-flammable material, easy to cut and paint.

### Technical data:

- Material: non-flammable plastic
- Length of the cable trunkings: 2 m
